

EPA Pesticides & Pesticide Devices: Disclaim Declaration

If the determination has been made that EPA reporting is **NOT REQUIRED**, please complete the following certification. Reporting/disclaim guidance follows below.

I, hereby, certify that the goods entered in this shipment are exempt from the EPA laws and regulations that require reporting. **Goods that are disclaimed in error may be subject to action by EPA. By signing this form, I acknowledge that I have read the form and understand my responsibilities as the importer of record.**

Description of Goods: _____

HTSUS Number(s): _____ 10 Digits Required

Shipment Entry No., Invoice or Reference No.: _____

(Single Shipment Declarations ONLY)

Deringer will no longer accept paper blanket forms starting on October 1, 2026. Blanket declarations will need to be submitted on our new [DocPort platform](#).

Company Name: _____ Account Number: _____

Address: _____

City, State/Province, and Zip/Postal Code: _____

Name of Certifying Individual: _____ Title: _____

Phone No.: _____ Email: _____

Signature: _____ Date: _____

Do I need to Report or Disclaim Pesticides Information to EPA for my Product(s) or Device(s)?

Pesticide Product – Contains a substance or mixture of substances that is intended to destroy, repel, prevent, or mitigate (lessen the severity of) a pest. This includes substances that attract pests to lessen their impact, for example by attracting pests to a trap. Some examples include insecticides (e.g., kills or repels insects, ticks and mites), herbicides (e.g., kills weeds or unwanted plants), fungicides (e.g., kills mold, mildew, and other fungi).

How these are regulated: Must be [registered](#) unless it qualifies for an exemption.

Pesticide Device – An instrument or contrivance (other than a firearm) that is used to destroy, repel, trap, or mitigate (lessen the severity of) any pest such as insects, weeds, rodents, certain other animals, birds, mold/mildew, bacteria, and viruses. Works by physical means, such as electricity, light, or mechanics, and does not contain a substance or mixture of substances to perform its intended pesticidal purpose. For example, water treatment units that reduce or eliminate microorganisms from water are considered a device or could be a pesticide.

Combination – If an instrument, contrivance, or appliance incorporates a substance or mixture of substances to perform its intended pesticidal purpose, then it is considered a pesticide product.

How these are regulated: Must be [registered](#) unless it qualifies for an exemption.
